

# Comet Coca Cola

**Artist: Marjorie Hall Bicker**

**Location: 221 E. 9<sup>th</sup>**

This mural was financed by Winfield Coca Cola Bottlers and Felts Oil. The Filling station in the mural is a “portrait” of the original Phillips 66 Station located on the corner until the 1950’s. The Coca-Cola disks date from early in the 1900’s. Because the wall was rough limestone, all the detail work and figures are actually modeled in bas-relief. The modeling is done with a polymer-modified cement designed to repair bridge abutments. Most of the work on the mural was done between midnight and 6:00 a.m. to avoid the heat and wind.
